ReignAir™

Release Valve Monitoring Solutions... Simplified. Affordable.

Ultimate Control of all
Your
Air Release Valves
Save Time and
Prevent Damaging Leaks

Visibility

- Custom Dashboards
- 24/7 Monitoring
- Historical Data and Trend Analysis
- Real-Time Alerts

Decrease Spills

- Monitor Pressure and Leak Detection on All Valves
- Text, Email, & Voice Alerts on Exceptions
- Customize Thresholds
- Analyze Troubled Locations

Safety

- Minimize Truck Rolls
- Know there is A Problem Before Accessing Valves in Congested Locations

Accessibility

- Access Information from the Dashboard Anywhere, Anytime via the Custom Cloud Based Dashboard

Increase Efficiency

- Reduce Operating Costs
- Increase Field Personnel Effectiveness

More About this
Revolutionary
Technology!

Understaffed municipalities don't need to be burdened with field personnel checking air release valves or relying on the public to report visibly leaking valves. But failure to service valves that need attention can lead to increased pump run times, pump failures, pipe breaks, leaks, and a host of other problems.

FEATURES

- Instant text, Email, and/or Phone alerts for leaking valves and unexpected pressure changes
- The battery operated ReignAir installs in minutes with no need for special tools or training
- Mapping function provides system wide status at a glance, including visual alerts
- GPS location helps keep track of remote or hard to reach air valves
- Live and historical pressure readings are available from the dashboard
- Installs on existing or new valves

Contact us for bulk orders and quantity discounts

FEATURES

- Protect existing pipes and equipment, reduce pump run times, and detect blockages and breaks
- Make life easier, free up valuable time, and save resources by taking the guesswork out of problems
- Prioritize maintenance and get ahead of issues before they get out of hand
- Insight into remote portions of a system previously inaccessible with other monitoring solutions
